

SL: Overfilled lips are OUT! Here is what's IN?

SSL: Why More People Are Choosing Natural-Looking Lips

Hi [FIRST NAME]

Have you ever stood in front of a mirror and wished for the perfect pout?

I used to take selfies for hours, making “duck lips”.

Yup, I was stuck over-lining my lips.

This was the only way my top lip got the memo to show up to the party...🤣

I was fed up.

But I wanted my lips to look just a bit fuller, so I started my research.

Big, bold lips? Not so anymore.

More and more people are asking for natural-looking lips (some even dissolving their old filler!).

Here is why...

👉 **The trend to having super-inflated lips was OVER.**

Fat lips became highly popular when Kylie Jenner became a household name, and her lips were every girl's dream!

In fact, in 2023, Kylie decided to remove her overdone filler and give it a more natural look.

Does this mean she will or hasn't had any fillers since?

Your girl Kylie is still getting those lips filled...just more NA-TU-RAL!

👉 **Problems with product migration.**

When lips are overfilled, the product can migrate beyond the lip line, sometimes even toward the nose. This is what causes the infamous “duck lips” look.

Here's what that can look like:

🚫 Not matching the rest of your facial features.

Not everyone is meant to have super-full lips. When lips are enlarged too much, it can throw off the balance of your facial features and change your overall appearance.

On the left - Maxed out lips

On the right- Natural Lips

While some people still love the big lip look, more clients are asking for less product and a more realistic result.

Now, don't get me wrong, clients still wanted a little extra volume, just not the overdone look.

Here's what you can expect with us:

- Subtle, natural-looking enhancement that suits your face
- A comfortable, caring experience every step of the way
- Honest advice—never pressure to go bigger than you want
- Results that help you feel confident in your skin

Achieving natural-looking lips is different for everyone. We consider your desired level of augmentation, the thickness and shape of your lips, any asymmetry, and the golden ratio for facial balance. Most clients need just 0.5 ml to 1 ml per session for the best results.

At Simply Radiant Aesthetics, we make sure your lip enhancement delivers the natural look you've been wanting.
